EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

Atlanta, Georgia

M.S. in Quantitative & Computational Finance

M.S. in Computational Science & Engineering

August 2025 – December 2026

- GPA: 3.5 / 4.0
- Key Coursework: Large Language Model, Machine Learning, Data Mining & Stats Learning, Modeling & Simulation, Algorithms, Data Analysis & Visualization, Derivative Securities, Stochastics Process, Computational Data Analysis

B.S. in Business Administration, Information Technology Management

August 2020 – December 2024

- GPA: 3.9 / 4.0 (Highest Honor)

WORK EXPERIENCES

HALLMARK CARDS

Kansas City, Missouri

Data Engineer – Data Engineering and Analytics Team

February 2025 – July 2025

- Engineered automated ETL pipelines processing 10M+ monthly CRM records using SQL and JCL/CTL, cutting report processing time by 30%, supporting demand forecasting and data-driven decision making across cross-functional teams.
- Collaborated with cross-functional Analytics teams to translate complex business and technical requirements into structured data solutions, designing field mappings and transformation logic for 20+ product modeling initiatives.
- Validated and tested 500K+ records across multi-source databases, verifying transformations against business logic and documentation standards, improving accuracy by 15%.

Data Scientist Intern

May 2024 – December 2024

- Developed machine learning models to forecast holiday card demand using CRM data and Python, translating predictive analytics into strategic business recommendations for cross-functional stakeholders.
- Managed the full lifecycle of 40+ dashboard migrations from MicroStrategy to Power BI, conducting UAT/QA testing from initial testing through deployment and improving functionality and accuracy by 20%.
- Collaborated with data engineers and stakeholders to deploy 100+ CRM and PreHR dashboards, using Jira for task management and tracking across globally distributed teams.

CREDIT ONE BANK

Las Vegas, Nevada

Quantitative Risk Management Analyst Intern – Collections Strategy Team

June 2023 – August 2023

- Analyzed 6M+ credit card accounts using SAS to identify delinquency trends and quantify risk factors, supporting risk assessment and credit loss mitigation strategies.
- Evaluated monthly performance of 30+ internal and external collections agencies on 2.5M+ delinquent accounts records using SAS and Python, analyzing key risk drivers with heatmaps and improving collections efficiency by 12%.
- Constructed Excel-based financial models to track critical risk metrics (delinquency rate, roll rate, recovery rate), enabling targeted interventions and developing hands-on experience with cost structures, pricing, and revenue analysis.

HEALTH CARE PROGRAM ADVISORS (HCPA)

Atlanta, Georgia

Healthcare Consulting Analyst Intern

August 2023 – December 2023

Boutique healthcare consulting firm specializing in revenue cycle and data analytics for healthcare provider, acquired by Coker in 2026.

- Created interactive Tableau dashboards for client to monitor Snowflake credit usage and query volume on a daily, weekly, and monthly basis, enabling real-time tracking and contributing to a 10% reduction in compute costs
- Authored 20+ documentation guides for Power BI dashboards and led physician enrollment initiatives, supporting customer enablement and improving user onboarding processing time for 200+ physicians by 15%.
- Used Alteryx to extract and transform 10,000+ records across multiple source databases, resolving inconsistencies and improving data accuracy, then loaded the results into Snowflake with optimized schema design to speed up query retrieval.

PROJECT & RESEARCH

Research Assistant – Blockchain Technology Research Article

"The Impact of Blockchain-Enabled Smart Contracts on Firms' Operational Efficiency," *Journal of Operations Management* (2025)

- Processed and cleaned 600+ data points using Python and Excel to support empirical analysis of blockchain adoption.
- Mapped and analyzed state-level blockchain bills and smart contract regulations, providing quantitative insights into paper.

SKILLS

Technical Skills: Python (Pandas, NumPy), SQL/MySQL, R, C/C++, SAS, Tableau, Power BI, Mainframe, Alteryx, MATLAB
